Technique, sensibility and above all passion they are the necessary dowries to realize a great film of marriage. To get married in Italy, France, Switzerland, United States, Greece,

Europe or in any other place of the world doesn't care because we are always enthusiastic to tell anywhere your emotions. We love all that that belongs to the world of the marriage and therefore, both that you deal with an Italian Wedding or a Destination Wedding, we will always be pushed by a strong stimulus that will make us always do our job to the best. Don't ask us a video of your marriage, but ask us the video of marriage as have always dreamt it! Every event is an unique history, never repetitive, in degree to tell with love, and with a touch of art, all of this that we will realize for your video.

OUR WORK

Video service is always composed of two videomakers, this is because we do not want to risk not documenting all the emotional moments, always busy for the duration of the service. It begins by documenting the stages from when the newlyweds are preparing, involving reportage style all the guests who are participating in that location at that time.

Immediately after we go to ceremony, it is our use to arrive before the couple to document moments of friends and relatives who are waiting for the couple, they are very beautiful and spontaneous scenes.

During the ceremony, we shoot without the use of lights, we do not want the couple to get distracted, they are annoying and attract our attention, the video must be as spontaneous as possible and with natural light.

After the ceremony, we move with the couple in a location, that will be decided together, to make little session of portraits, no fake poses...we try to leave them as natural as possible.

Immediately after, we go to the location where we will always document the party in reportage style, given the importance of the event we want to get to the restaurant early enough to ensure that the spouses live their full day with friends. We are with you all day!

For each Wedding we always use different music that adapts to the type of wedding we film. We have two music suppliers from whom we buy all usage rights, we never try to make videos all the same to each other, but to adapt them to the type of wedding and the type of couple you will be the one with what you will realize and organize for your wedding to make the video more beautiful (details make the difference). We really like to excite the people who watch our videos.
